Mern Stack & React Developer

Experience Summary

2+ years of software industry experience which is further divided into blend of expertise in Mern Stack & React Development and secure architecture design, along with a track record of solving complex challenges.

My ability to lead projects to success and continuously adapt to new technologies makes me a valuable asset to innovative teams seeking efficient and impactful solutions.

Technical Skills:

Front-end technologies	React.js, Next.js, React Native, ES6 JavaScript, Html & Responsive Web Design, CSS, tailwind CSS, Redux, Bootstrap, Material UI, ANTDDesign, JQuery and AJAX
Database	Microsoft SQL server, MySql, MongoDB, Firebase, CouchDB
Programming Concept	OOPS, Data Structure, API, DOM, JSX, Cryptography, JWT, Cross Platform Compatibilities
Backend Technologies	Node.js, Next.js, Rest Framework, .Net Core MVC, .Net Web Api, Express.js
Version Control & Task Management	Jira, Azure Devops, Github, Git CLI, Gitbash, Tortoise git
Handy Development Skills	Debugging, Code Review, UI/UX Design Implementation, Performance Optimization, Security Practices, Continuous Integration/Continuous Deployment (CI/CD), Problem-Solving

Education Profile

Exam	University/Board	Year	Percentage
10th	GSEB	April - 2018	73.5%
12th	GSEB	April - 2020	74.5%
BSC(IT)	GLS	April - 2023	86%

Employment

Fab 2022 – Jan 2024 – Fortune Infosys at Ahmedabad.

React Developer

Project Experience

Pathshala React (Project Leadership)

Role: Project Leader & React Developer

Technologies: React, Axios, Material UI, Redux, JWT, REST API, Security Features, 3-Tier Architecture

Description: As the Project Leader for the Pathshala React initiative, I led the development of an educational platform, demonstrating expertise in:

- Utilizing React and Material UI for user interface design.
- Implementing Axios for efficient data fetching and integrating Redux for state management.
- Securing user interactions with JWT and ensuring seamless backend integration via REST API.
- Designing a 3-tier architecture to separate concerns across presentation, business logic, and data access layers.

My leadership ensured the project's success by creating a dynamic, interactive, and secure learning environment, highlighting my ability to manage complex technical challenges and deliver high-quality solutions.

The Structures (React Developer)

Role: React Developer

Technologies: TypeScript, React (Vite)

Description: In the "The Structures" project, as a React Developer, my contributions were multifaceted, involving both technical development and direct client interaction:

- Employed TypeScript and React Vite for a robust, efficient development environment.

- Utilized React Query and TanStack for advanced server state management.
- Designed Custom Hooks for reusable component logic.
- Implemented Redux for comprehensive state management.
- Integrated MUI (Material UI) and Ant Design for aesthetically pleasing, responsive UIs.
- Applied Axios for efficient data fetching.
- Engaged directly with clients to understand requirements and swiftly address major bugs.

My role balanced sophisticated technical implementation with proactive problem-solving and communication, ensuring client satisfaction and project success.

NGO Union (Full Stack Development)

Role: MERN Stack Developer, React Native

Technologies: MongoDB, Express.js, React, Node.js, Figma

Description: For the NGO Union project, as a Full Stack Developer on a React Native app, my key responsibilities and achievements included:

- Designed the app interface from scratch, ensuring a user-friendly and engaging experience.
- Utilized Redux for state management and React Query for efficient server-state synchronization in the app.
- Developed Custom Hooks to encapsulate and reuse complex logic across components.
- Implemented Paper UI for a consistent and modern look and feel.
- Crafted RESTful APIs and designed the data dictionary and schema relationships, enhancing data flow and integrity.
- Integrated JWT for secure authentication and implemented advanced security measures to protect the app.
- Ensured seamless front-end and back-end integration, leveraging my full-stack capabilities to deliver a comprehensive solution.

GIS (REST API Dev & Database Engineer)

Role: REST API Developer & Database Engineer

Technologies: C#, .Net, .Net Web Api, MSSQL, Web Forms

Description: In the GIS project as a Backend Developer, my role encompassed a comprehensive set of responsibilities:

- Focused on backend development, utilizing C#, .Net, ADO.NET, .Net Web API, MSSQL, and Web Forms.
- Spearheaded the development and management of RESTful APIs, optimizing data interaction and service integration.
- Applied OOP concepts to enhance code modularity and reusability.
- Managed database operations, leveraging MSSQL for robust data storage and retrieval mechanisms.
- Ensured effective communication with the project manager to align development goals and priorities.
- Utilized JIRA for project tracking and issue management, facilitating a smooth development process.

- Played a key role in streamlining employee management processes for an organizational site, significantly improving operational workflows and system efficiency.

Winmill (.NET Development)

Role: .NET Developer

Technologies: .Net, MSSQL, .Net Web Forms, c#

Description: In the Winmill project as a .NET Developer, my contributions were:

- Developed and enhanced features using C# and .NET Web Forms within a union management platform.
- Managed MSSQL databases, optimizing performance and ensuring data integrity.
- Applied OOP principles for maintainable and scalable code architecture.
- Identified and resolved critical system bugs, significantly improving reliability and user experience.
- Collaborated effectively with project teams to align on requirements and deliver solutions efficiently.

Looking Forward to

Eager to harness the power of the new Technologies for creating next-level web experiences, I'm on the lookout for opportunities to bring innovative ideas to life. With a track record of successful projects and a knack for teamwork and leadership, I'm ready to dive into new challenges and contribute to your team's success. Whether you're looking for a developer who can lead, innovate, or inspire, let's connect and discuss how we can make a difference together.
